

AS/EN9100:2009 (Rev C) Implementation Programme - using the *process approach*

Volume 7, Issue 3

July 2010

TEC TRANSNATIONAL

AS/EN9100:2009 (Rev C) – using the ‘process approach’

AS/EN9100:2009 mandates the adoption of the aerospace process approach – blind conformance to the new clauses will not suffice!

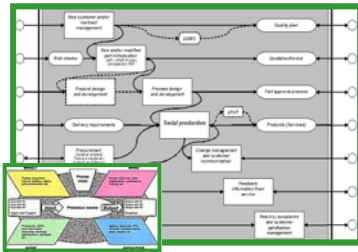

Applicable **regulatory** and **contractual** requirements must be incorporated – plus AS/EN9102, AS/EN9103 and *best-practices*.

“product conformity and on-time delivery performance must be measured and appropriate action must taken if planned results are not, or will not be, achieved”. Our innovative **Implementation programme** transforms basic AS/EN9100 conformance into a vibrant process-orientated AQMS.

The aerospace process approach AS/EN9100:2009 + best-practice tools

Mapping & documenting your QMS

Working with your staff, we identify and **map** all of your processes, along with their sequences and interactions. Use is made of **Turtle diagrams** to impose **controlled conditions** for these identified processes. The **key activities** of every

process are **process mapped** and augmented by succinct **documented procedures** in line with AS/EN9100 requirements. A new and upgraded (quality) **Policy manual** is produced which acts as the ‘hub’ of your **upgraded AQMS**.

Hyper-linked documentation

With the QMS documentation complete and accepted, we **hyper-link** the various elements in MS WORD[®]. No special software is required and we **test** out the entire system *in situ*.

The resulting *modern* and *user-*

friendly system is accessible from *your network* and is password controlled.

Organization KPIs are linked to **process-level metrics** including **SC21** delivery and quality performance measures.

Effective & efficient implementation

Remember that your customers can mandate AS/EN9100 certification!

We identify ‘skills gaps’ and assess the use of **SC21 lean enterprise tools** – then provide practical workshops and coaching to ensure competency. Included are topics **System/Product Auditing** and **Nadcap process auditing**,

FMEA, MSE, AQP & Control plans, Capability studies & SPC, 8-D Problem solving and BOS/QOS.

Blended learning is *synchronized* with system implementation so that newly acquired skills can be used immediately.

We are TEC Transnational

TEC are first and foremost an implementation and empowerment organization. We have successfully guided over 350+ organizations through to aerospace and automotive third-party registration

TEC are committed to the process approach and we vehemently believe in integrated and value-added management systems

- **SC21 Strategic Partner**
- **SC21 Training Partner**

Check out the **Gallery** and **Projects & Testimonials** sections of our corporate web site at www.asen9100.com to see a cross-section of organizations who have already benefited

from our training and consulting services.

Our unique **Implementation programme** will transform basic AS/EN 9100:2009 conformance into a vibrant *process-orientated* business operating system. It creates a **synergy** between the **aerospace process approach** and best-practice approaches such as **Lean Enterprise, Kaizen Blitz** and **Six Sigma** to achieve maximum SC21 performance.

The **AS/EN91XX Implementation programme** is phased and tailored to meet your organization's exact needs – so that you only pay for what you need.

- **It works for organizations already certified to**

AS/EN9100 who want to upgrade to AS/EN9100:2009 and the process approach.

- **It works for organizations implementing AS/EN9100 from scratch who want to maximize the benefits and minimize the hassle!**
Everything necessary is provided to guarantee a robust certification.

We also offer a **Supplier development programme** focused on AS/EN9100 which measurably improves supplier performance in the specific SC21 areas of delivery and product quality – and delivers AS/EN9100:2009 certification. **Grant funding for all types of project may be available.**
